

Have you received health care services in Hastings and Prince Edward Counties?

We'd like to hear from you!
Please complete this short survey:

The Province of Ontario has made investments in a broad range of digital health tools available to family doctors and nurse practitioners. At the request of patients, we are actively exploring the introduction of online patient portals with access to patient personal health information and online appointment booking.

It takes less than a minute to complete!

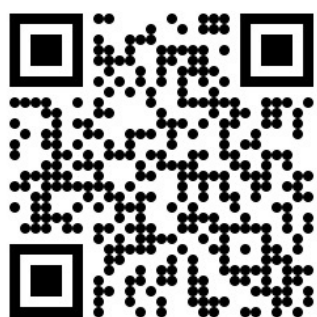

Survey Objectives

1 understand the needs and wishes of patients and families for additional access to medical records with a focus on accessing their personal health information created and maintained by primary care providers.

2 to collect information about patient and family current use of online portals to access patient health data, across all health care groups such as family doctors, nurse practitioners, hospitals, home-care, long-term care.

Help us transform the health care system here in Hastings and Prince Edward Counties!
